EDUCATION

Siddaganga Institute of Technology

Bachelor of Technology in Computer Science and Engineering

- CGPA: 8.1

Tumakuru, Karnataka

Nov 2023 – June 2027

K N I T PU College

Class XII (PCM)

- Percentage: 90.1%

Jammu & Kashmir

2023

K N I T PU College

Class X (PCM)

- Percentage: 91.4%

Jammu & Kashmir

2021

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

Web Development: React.js, Django, Django REST Framework, FastAPI, Streamlit, HTML, CSS

Databases: PostgreSQL, MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code, Postman

Deployment: Vercel, Render

Systems & Networking: Linux, Computer Networking, WebSockets

Security: JWT Authentication, TLS Encryption

PROJECTS

PathMate | [GitHub](#) | *React.js, Django REST Framework, PostgreSQL, JWT, Tailwind CSS, Vercel, Render*

- Architected a full-stack mentorship platform with JWT-based authentication, RBAC, and session booking, supporting distinct role-specific onboarding flows for mentors and mentees.
- Designed a multi-parameter mentor discovery system using advanced Django ORM queries across college tier, domain expertise, and experience level filters.
- Integrated asynchronous email notifications via Brevo API with background threading, maintaining reliable delivery under cloud deployment constraints.
- Deployed a decoupled production architecture with React on Vercel and Django/PostgreSQL on Render, using environment-separated configurations for clean staging and production parity.

SecurePay AI | [GitHub](#) | *React, Node.js, Express.js, PostgreSQL, Prisma ORM, Gemini AI*

- Built a production-grade digital payments platform supporting wallet management, beneficiary onboarding, P2P transfers, and deposit settlements with role-based access control.
- Implemented a double-entry ledger backed by ACID-compliant transactions, ensuring complete financial auditability and accurate reconciliation across all transfer flows.
- Engineered a real-time fraud detection engine using velocity checks, risk scoring, and behavioral heuristics to automatically flag and block high-risk transfers before settlement.
- Resolved distributed systems challenges including race-condition prevention, idempotent webhook handling, and concurrency control across simultaneous transaction requests.

ACHIEVEMENTS

Competitive Programming:

- Shortlisted for **HackWithInfy Round 2** (Infosys national-level)
- **Runner-Up** at IEEE coding event
- **3rd place** at ByteSurge contest
- Solved **350+** LeetCode and **1000+** CodeChef/GFG problems
- Active participant in LeetCode and HackerRank coding contests

Hackathons: **5th place** at Hack-CSE-lerate; participated in **4+** hackathons.

Leadership: Organized a non-technical event under **PATHFINDER** club, managing logistics for **500+** attendees.
